

The role of the examiner is to observe and accurately record data. Section 232.1 of the M-39 Handbook requires the examiner to do the following:

Any claims of a violation of these requirements should be supported by a detailed statement from the letter carrier(s) involved.

**M-39**

232.1 The route examiner must:

- a. Not set the pace for the carrier but should maintain a position to observe all delivery points and conditions.
- b. Not suggest or forbid any rest or comfort stops but should make proper notations of them.
- c. Not discuss with the carrier on the day of inspection the mail volume or the evaluation of the route. These matters must be discussed with the carrier at a later date when all data has been reviewed and analyzed.
- d. Make notations on the day of inspection on the appropriate form or separate sheet of paper of all items that need attention, as well as comments on the day of inspection. Also list any comments or suggestions for improving the service on the route, as well as suggestions or comments made by the carrier during the course of the inspection for improvement in delivery and collection service.
- e. Make comments and suggestions clearly, and in sufficient detail for discussion with the carrier and for decision-making purposes. The manager who will actually discuss the results with the carrier must have enough facts and figures to reach a final decision on any necessary adjustments to the route.
